PROFESSIONAL OBJECTIVE

Student majoring in Quantitative Methods in Economics and Information Systems at SGH Warsaw School of Economics, seeking an internship in data analysis, supply chain/operations analytics, or financial analysis. Brings hands-on experience in statistical modelling, Excel-based simulation, and survey-based research, with a strong ability to turn quantitative findings into clear business recommendations.

EDUCATION

SGH Warsaw School of Economics

Oct 2024 – present (expected Oct 2027)

B.Sc. Quantitative Methods in Economics and Information Systems · Warsaw, Poland

- Core coursework: Mathematics, Statistics, Survey Methods, Macroeconomics, Microeconomics, Accounting, Spreadsheet Simulation, Marketing.
- **Survey Methods:** conducting primary data collection, questionnaire design, and quantitative analysis using Jamovi (descriptive statistics, correlation, ANOVA, regression).
- Courses taught in English in an international academic environment.

ACADEMIC PROJECTS

Optimization of Currency Hedging

Spreadsheet Simulation Course · SGH Warsaw

- Built a Monte Carlo simulation model in Excel to determine the optimal EUR/PLN hedging ratio for a Polish import company facing €77K monthly currency exposure under varying market conditions.
- Ran 5,000+ scenarios and conducted sensitivity analysis to quantify how changes in bank spreads and volatility affect the probability of financial loss.
- Delivered a comprehensive technical report combining quantitative risk analysis with visualization of risk-return trade-offs to support management's hedging decision-making.

Inventory Cost Optimization

Academic Project (SGH)

- Built a Monte Carlo simulation in Excel to evaluate inventory strategies under highly volatile demand and uncertain lead times.
- Performed sensitivity analysis using Data Tables to identify the optimal Reorder Point and Order Quantity.
- Proposed a data-driven policy that reduced average daily costs and improved service levels to 99%.

Bank Loan Performance Dashboard

Personal Project

- Analyzed loan datasets using SQL to calculate critical MTD/MoM financial KPIs (funded amounts, DTI, interest rates).
- Assessed portfolio health by developing a 'Good vs. Bad Loan' classification model to track repayment and default risks.
- Built interactive Power BI dashboards to visualize regional and demographic trends, supporting strategic lending decisions.

SKILLS

Analytical: Statistical modelling, sensitivity analysis, survey design & analysis, data visualization, financial modelling, market research.

Technical: Microsoft Excel (Data Tables, What-If Analysis, Pivot Tables, VLOOKUP/INDEX-MATCH), Power BI, Jamovi, PowerPoint, Word, SQL, Canva.

Languages: English (C1 – professional working proficiency), Vietnamese – native, Chinese (HSK3-4)

ADDITIONAL INFORMATION

- Valid Polish student residence permit — no work authorization issues for EU-based internships.
